

TRG PARKING SURVEY. 10th October¹ & 16-20th October 2017 (Excluding 2 hour-limited spaces in Queens Road)

Average Cars Parked vs Average Free Parking spaces

NB: Parking stress is determined by levels of availability *throughout* the day. In the zone surveyed, the mid morning pinch point, when parking is at 98.5% of capacity, highlights its inability to absorb more parked vehicles.

¹- Survey only conducted at 10.30 on 10th October 2017.
Conducted at 08.30, 10.30 and 15.00 on the other five days
